

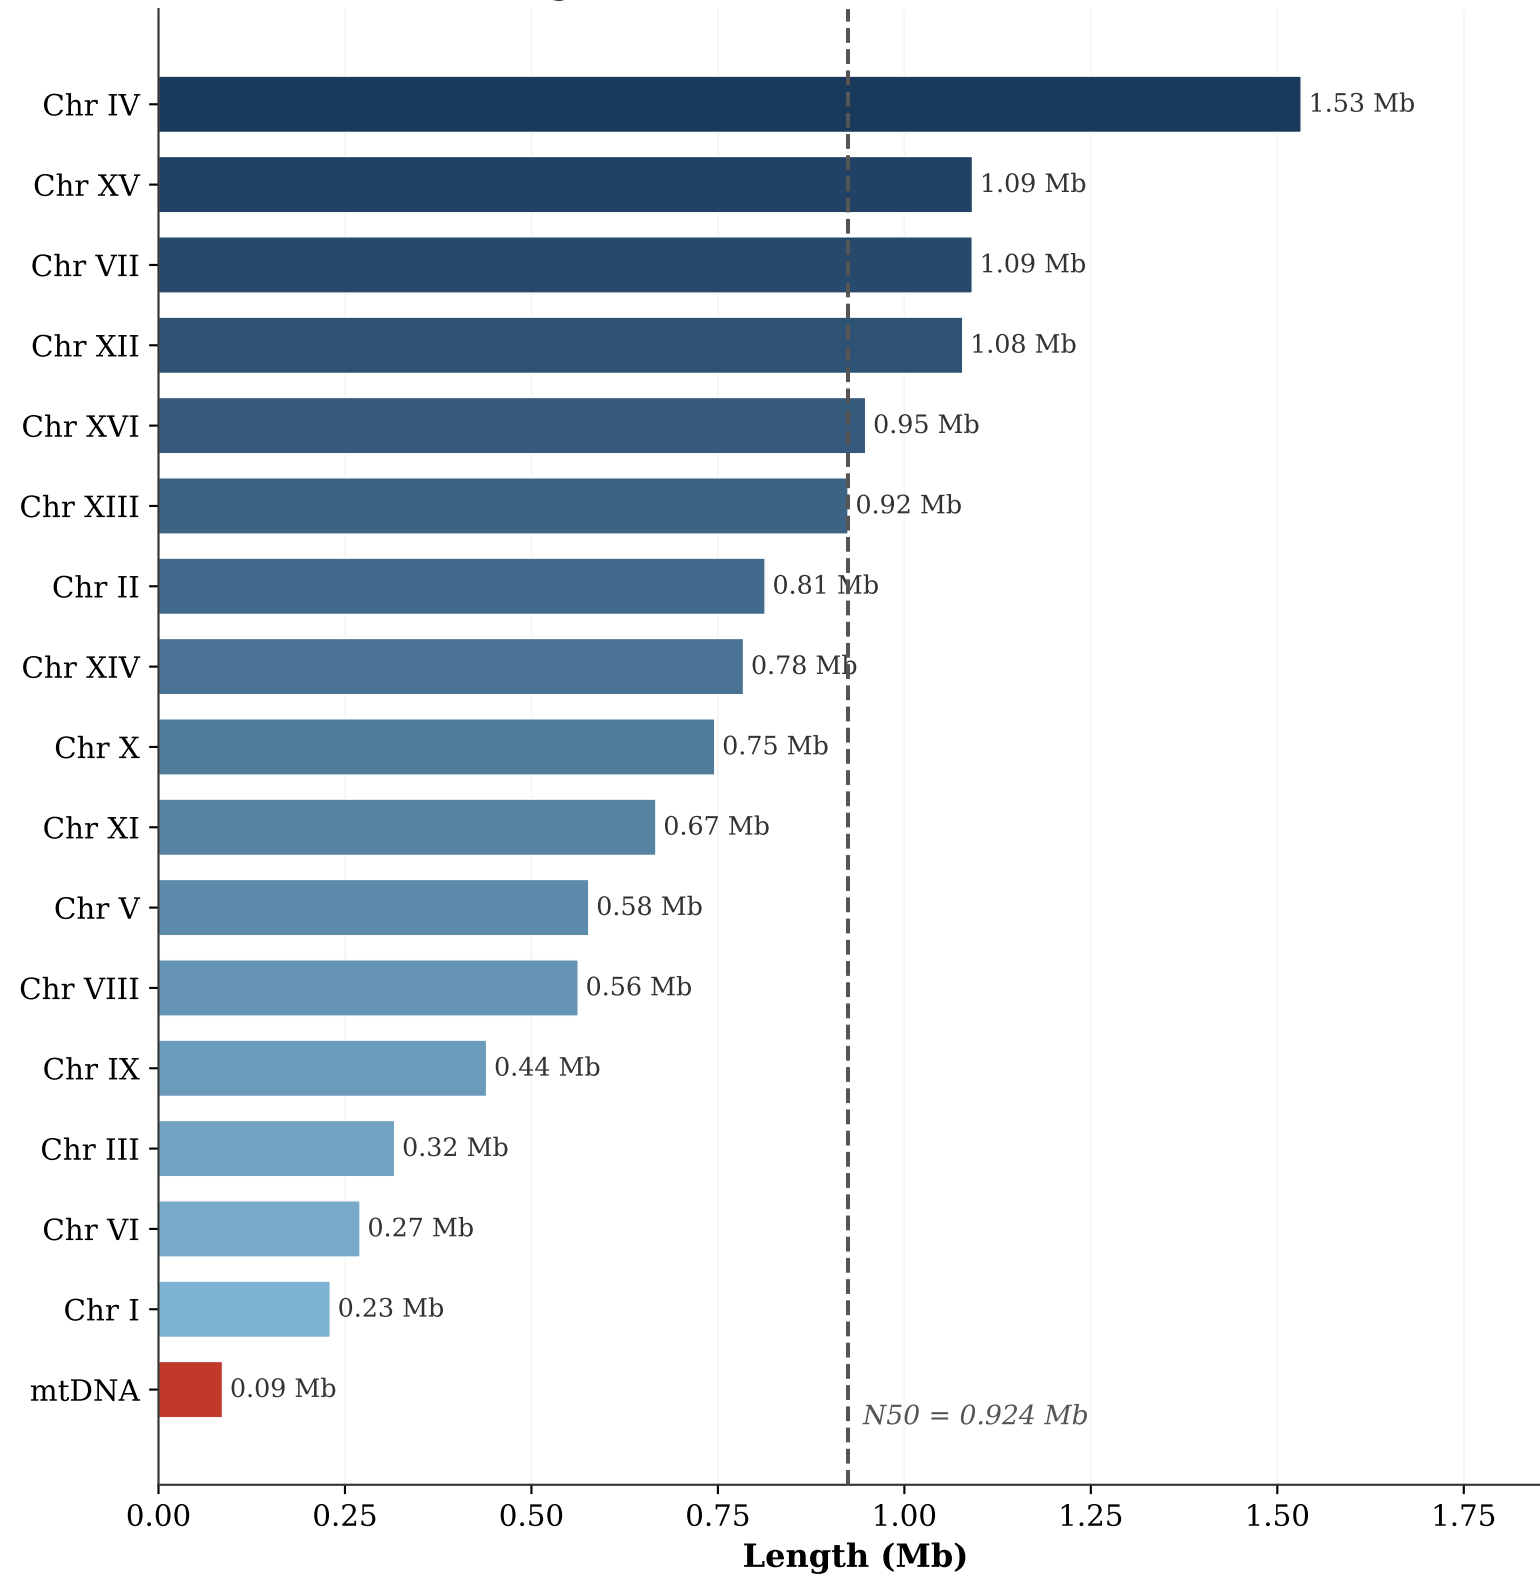

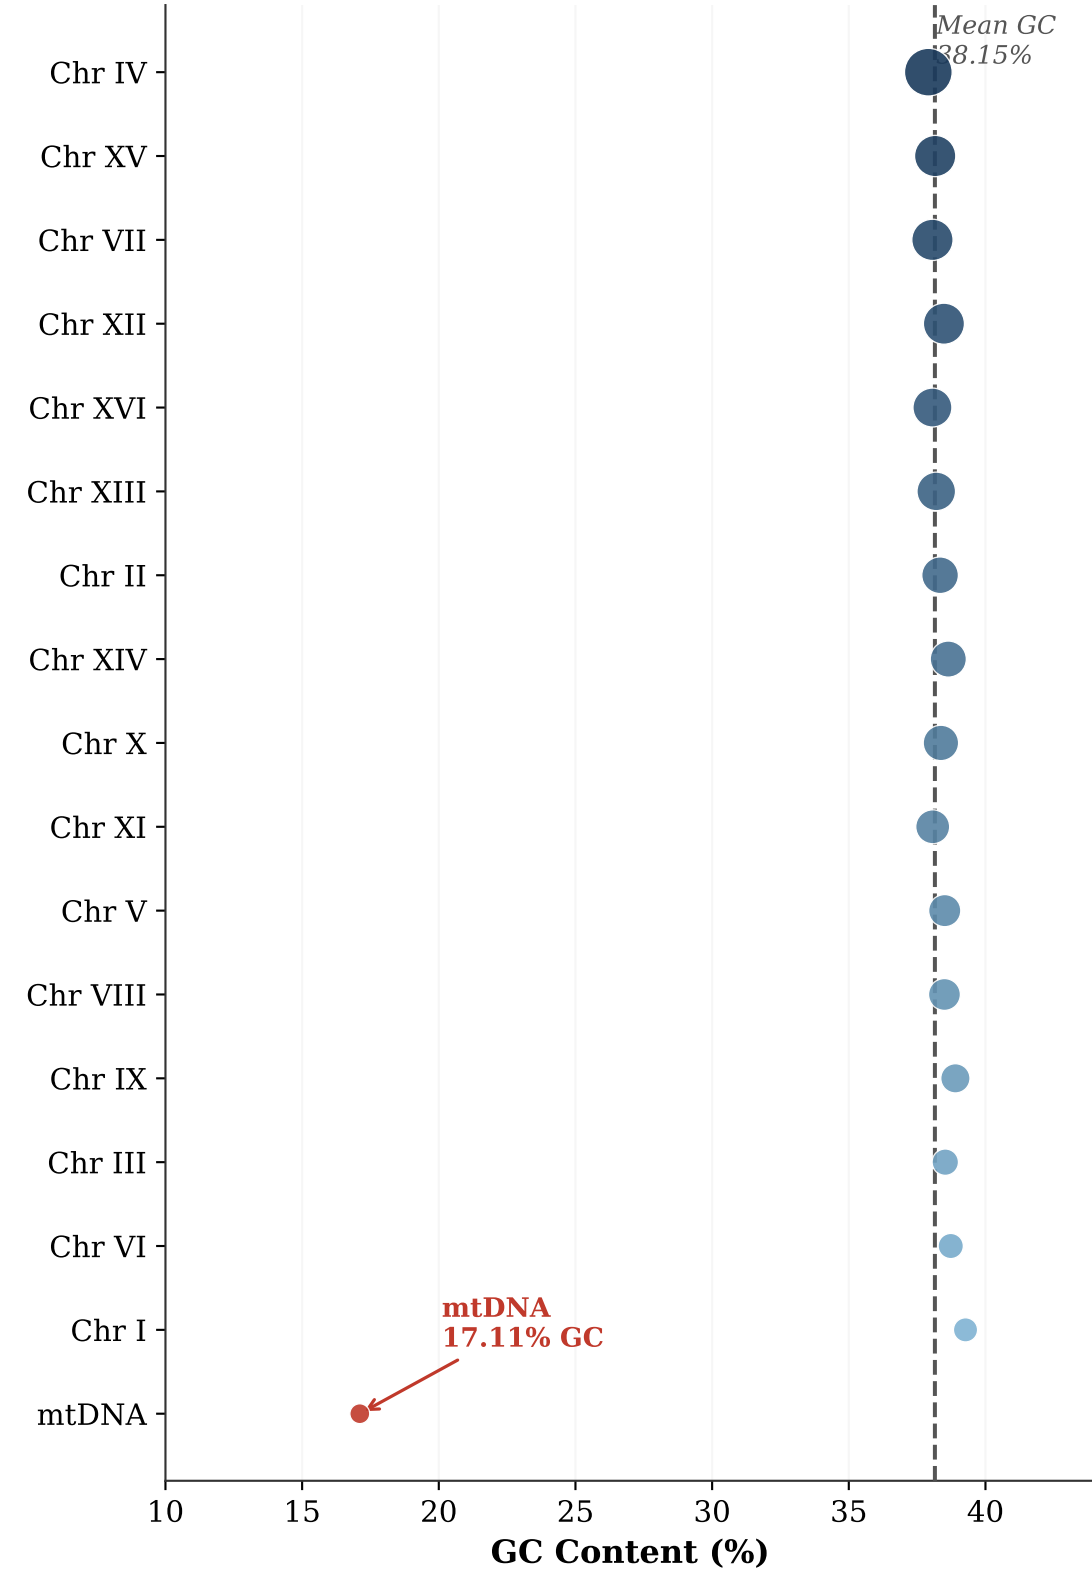

Figure 1. Genome Architecture of *S. boulardii* CNCM I-745

17 sequences | 12.16 Mbp | GC 38.15% | N50 924,431 bp

A Chromosome Length Distribution

B GC Content per Chromosome

HXT9 and HXT11 loci absent from assembly — consistent with CNCM I-745 strain identity (Khatri et al. 2017)
